### Cookies usage

This website uses cookies to make its services more efficient and simpler for the user.

Minimal quantities of information will be saved as text files called “cookies” in the user device, such as computer or mobile devices.

These files are saved in the appropriate directories of the used web browser.

There are different types of cookies, whose aim is to make the navigation of the website simpler or for enabling some additional functions. For more information, see <http://www.aboutcookies.org/>

This website uses only technical session cookies.

No personal data are gathered by this website.

Cookies are not used for transmission of the user personal data, nor are used persistent cookies, i.e tracking systems of users.

The use of session cookies (that are not persistently stored on the user device and disappear closing the browser) is strictly limited to the transmission of session identifiers (that are build using random numbers generated by the server) necessary for the secure and efficient use of the website.

The session cookies used by this website make unnecessary to use alternative IT techniques potentially harmful for the privacy of the user: session cookies do not allow the acquisition of the user personal data able to permit his/her identification.
